

**Daily Deposit Digitalization** is a holistic FinTech suite developed for the bank as well as its agents and customers to simplify the daily money depositing cycle. This is a robust solution built on thorough research and is a one-stop-shop for all the transaction issues faced by banks and customers. No need for a second thought because your money is safe when we suffice your transactions.

#### Daily Deposit Agent App

Helps the agents with all the daily collection requirements like updating the collection sheet, bank account and sending SMS to customers.

#### Daily Deposit Branch Site

Control panel for the bank where the bank gets analytics and reports on each and every transaction in real-time.

#### Daily Deposit C-Suite

Higher officials like the CEO, COO and CFO of the bank can get a bird's eye view of the everyday deposit history.

#### Customers App

Customers can view their passbook by installing this App in their mobile phone and get notified whenever a transaction happens.

#### Native Language

Suite is customizable into native language meeting the needs of the underbanked, enabling easy onboard and use by the local natives.

#### Insights for the Bank

AI-powered smart App can predict those areas that need more agents and the loan limit of a customer which will help banks to cross-sell products.

## Customer Speaks

Suresh C Das, CEO of SDCC Bank, which is our first customer says, "When we decided to digitize Odisha's 1st cooperative bank's daily deposit life cycle, we were worried it might hamper the daily business as it was an old legacy system. But it was a cakewalk for Techsofin! The implementation was smooth and quick! Their technical efficiency and humble nature while clarifying doubts just awed me. Simple and smart solution for all - This is what Techsofin is for us."

# Digitalizing the touchpoints of the underbanked

## TechSofin

## About Us

Techsofin is an upcoming FinTech startup which was incubated in the KiIT TBI with a goal to provide robust and user-friendly solutions to enable seamless transactions. It was founded by three young entrepreneurs- Ankur B Patel, an alumnus of ITER & XIMB with experience working with many top Indian & International banks & NBFC's for transitioning them to digital platform; Santwana Sagnika, an alumnus as well as an Asst. Professor at KiIT with a record of published research papers in international journals and Priyadarshini Pradhan, an alumnus of ITER with much needed work experience with Government as well as FinTech sectors.

## Vision

To be the most innovative Fintech company that serves all sections of society.

## Mission

To empower financial institutions to achieve India's goal towards 100% financial inclusion through economical, efficient and scalable banking products.

## Why Us?

When Bitcoins and Cryptocurrencies are the next big update, some banks are still equating digital to the use of spreadsheets to maintain data! Our solutions are best made to address the needs of the underbanked, thereby digitizing their banking experience. We leverage the growth of your financial and commercial institutions with our principle of customer-centricity, to upscale its journey in the competitive FinTech world.

## Features

### Daily Deposit Digitalization App

#### Quick Deployment in a week
